EXECUTIVE SUMMARY

HyperVault is an intelligent Android platform that unifies storage management, security, authentication, and data mobility through a proprietary contextual intelligence layer. The platform combines advanced mobile software with wearable devices to create a continuous trust ecosystem for Android users — secure, efficient, private and future ready.

THE PROBLEM

Mobile ecosystems are fragmented across storage, security, authentication, transfer and emergency response, creating poor user experience, duplicated data and weak contextual trust.

THE SOLUTION – HYPERVAULT

HyperVault introduces a **Contextual Intelligence Layer** built on five core technology pillars that unify data management, security, transfer and authentication into a single intelligent ecosystem.

5 KEY TECHNOLOGY PILLARS

- 1 Content-centric Storage
- 2 Duplicate Virtualization
- 3 Contextual Security & Access Control
- 4 Wearable-Aware Authentication
- 5 Context-aware Data Mobility

KEY CAPABILITIES

- ✓ Intelligent content discovery & organization
- ✓ Non-destructive storage optimization
- ✓ Context-aware security & encryption
- ✓ Continuous wearable-based trust
- ✓ Context-preserving transfers
- ✓ Emergency communication & response services

PRODUCT ECOSYSTEM

Android Platform

Premium Subscription Services

Smart Ring

Smart Band

Smart Card

Smart Keychain & Extensions

All devices operate on the common HyperVault intelligence platform.

TARGET CUSTOMERS

INITIAL USERS

- ✓ Android Power Users
- ✓ Privacy-Conscious Users
- ✓ Multi-Device Users
- ✓ Developers & Tech Professionals

EXPANSION SEGMENTS

- ✓ Women Safety Users
- ✓ Senior Citizens
- ✓ Solo Travellers
- ✓ Healthcare Workers
- ✓ Public Safety Personnel

BUSINESS MODEL

SUBSCRIPTION REVENUE

Premium Android services including:

- ✓ Duplicate Virtualization
- ✓ Contextual Security
- ✓ Advanced Transfer Intelligence
- ✓ Wearable-Aware Authentication
- ✓ Emergency Services

Target Pricing:
₹99/month or ₹999/year

HARDWARE REVENUE

Smart Ring

Future Wearable Ecosystem Products

Device Sales

FUNDING REQUIREMENT

Seeking
₹2.5 – 3 Crore
Seed Investment

Expected Runway:
24 – 30 Months

USE OF FUNDS

- Product Engineering
- Embedded Systems Development
- Smart Ring Development
- Hardware Prototyping
- Ecosystem Integration

WHAT WE ARE LOOKING FOR

- Incubation Support
- Strategic Mentorship
- Product Validation
- Seed Funding
- Investor & Industry Partnerships

CURRENT PROGRESS

- ✓ Content-centric Storage – 30% Completed (Demoable)
- ✓ Duplicate Virtualization – 20% Completed (Demoable)
- ✓ Contextual Security & Encryption – 20% Completed (Demoable)
- ✓ Context-aware Data Mobility – 25% Completed (Demoable – Browser Receiver)
- 🕒 Smart Ring Firmware Development – In Progress
- 🕒 Emergency Services Development – In Progress
- ✓ Initial Product Demo Release Preparation – Underway

INTELLECTUAL PROPERTY

5 Patent Applications Filed

Coverage:

- Platform Intelligence
- Storage Intelligence
- Security Intelligence
- Trust & Emergency Intelligence
- Transfer Intelligence

Protecting HyperVault's five core technology pillars.

LEADERSHIP TEAM

Anurag Verma
Founder, CEO & CTO

- 25+ years Enterprise Storage, Security & Replication Technologies
- Former Senior Principal Engineer at Broadcom, Symantec, Veritas & QLogic
- 3 Granted US Patents
- IIT Roorkee | Executive MBA (SIBM Pune)

Shashank Mishra
Co-Founder & COO

- 19+ years across Healthcare, Finance & Enterprise Software
- Operations, Partnerships & GTM Strategy
